Case with heater for cosmetic depilation - stores prepared paper impregnated with adhesive and wax and heats it before use

MOREAU P 16.01.79-FR-002384

(19.09.80) A45d-26 A45d-44

The cosmetic depilatory appts. produces a slight peeling of the skin to stimulate regeneration of the tissues. It consists of a case with a heater which heats an adhesive product fixed on paper to about 50°. The case holds a stock of prepared papers which are placed in slots under the heater before use.

The paper is cellophane and each sheet is folded with the adhesive inside. The adhesive is a mixture of 100 parts of cellophane, 50 parts of lanolin, and 10 parts of microcrystalline wax. 16.1.79 as 002384. (4pp1120).
